

Juvenile Moves in the Field Test

1. Stroking: Forward power circle

Starting from a standing position, the skater will perform forward crossovers progressively increasing in foot speed and acceleration throughout the entire move, from a slow, but gradually accelerating pace to fully accelerated crossovers. As the skater accelerates, the circle circumference increases. Power circles are performed in both counterclockwise and clockwise directions. It is recommended that no more than 15 crossovers be utilized in completing each portion of this move. This move may start in either direction.

Focus: Power

2. Stroking: Backward power circle

Starting from a standing position, the skater will perform backward crossovers progressively increasing in foot speed and acceleration throughout the entire move, from a slow, but gradually accelerating pace, to fully accelerated crossovers. As the skater accelerates, the circle circumference increases. Power circles are performed in both counter clockwise and clockwise directions. It is recommended that no more than 15 crossovers be utilized in completing each portion of this move. This move may start in either direction.

Focus: Power

3. Eight-step mohawk sequence

The skater will perform two eight-step mohawk sequences counter clockwise. The step order is: Forward crossover into a LFO mohawk, followed by LBI, RBO, LBI cross forward and RFI. The skater should maintain a march cadence (one beat per step). Between the circles is a two-beat left foot transition. The sequence is then repeated twice in the opposite direction. Introductory steps are optional. This move may start on either foot.

Focus: Quickness and power

4. Forward and backward free skate cross strokes

The skater will perform free skate cross strokes the length of the ice surface. Forward cross strokes will be skated for one length of the rink and backward cross strokes skated for the second length of the rink. Introductory steps and end patterns are optional. This move may start on either foot.

Focus: Power

5. Backward power three-turns

The skater will perform three to five backward power three-turns per circle in a figure eight pattern. One complete figure eight is required. A one or two-foot glide may be utilized when changing circles. Introductory steps are optional. This move may start in either direction.

Focus: Power

6. Forward double three-turns

The skater will perform consecutive forward double three-turns on half circles, with alternating of feet. Four to six half circles will be skated depending on the length of the rink and strength of the skater. The sequence begins with FO double three-turns covering the first length of the rink. The FI double three-turns will cover the second length of the rink. Introductory steps and end patterns are optional.

Focus: Edge quality
