

Technical Notification 312

Dated: Nov. 7, 2024

Re: Synchronized – Guidelines for Application of ISU Communication No. 2632

This technical notification outlines guidelines for the application of ISU Communication No. 2632 during domestic competitions for the 2024-25 season.

ISU Communication No. 2632 specifies a GOE of NHT -2 if a traveling element has no recognizable travel or travels less than $\frac{1}{2}$ of the ice.

For divisions with a cap of TrE1 or TrE2, achieving $\frac{1}{2}$ ice is not a realistic expectation.

For the levels listed below, a NHT -2 should only be applied when there is no recognizable travel:

- Preliminary
- Pre-Juvenile
- Open Juvenile
- Juvenile
- Masters
